Memory

Pixie

Our sweet Pixie was a kind and gentle soul. She was happiest sitting on someone's warm lap (lucky for me, it was my lap she sought out most often, we really were inseparable). She was sensitive and loved every person she met.

With other dogs, however, she was a 9 pound fire cracker and boss of all. She was definitely a front of the pack leader and her fur siblings, Rolo and Magoo, happily followed and adored her.

Pixie was rescued by Pawsitive Match who picked her up from a pound in Rosa County California. She made her way to our family and into our hearts immediately in September 2013 when we adopted her. She was approximately two years of age. We are comforted that she is resting easy now, but we all miss her terribly.
